

When a child is given a rapid and precise diagnosis using an Arclight, they are also given the chance of early treatment and recovery from blindness. This is a blessing for vulnerable families like Sombiniaina's.

"Thanks to Arclight, we can immediately detect a child's eye problems."

Dr. Richard Raberisoa,
Head Doctor of Ophthalmology,
CBM Partner

What is an Arclight?

An Arclight is a pocket-sized, solar-powered ophthalmoscope, that can go anywhere and be used at any time. It's perfect for outreach eye doctors working in remote locations in some of the world's poorest places.

By supporting CBM through your church, you can help provide this amazing little device to children and adults living in even the most remote communities, helping to prevent avoidable blindness. **A gift of just £32 can make life-changing eye care possible.**

How your church's love can
light the way for children like
Sombiniaina...

Sombiniaina's
parents did not
know what to do...

9-month-old Sombiniaina
and her parents live in a tiny,
remote village in Madagascar,
off the coast of East Africa.
For generations, parents
have had no idea that their
children's blindness can be
prevented and treated.

Your church can help **light the way...**

With a generous gift today, your church can share God's love through quality eye care for children like Sombiniaina, even in remote, hard-to-reach villages. Together, we can reach children who would otherwise have no access to the sight-saving treatment they urgently need.

...to **equip** outreach
eye doctors...

Every £32 your church gives can place an Arclight in the pocket of an outreach eye doctor, helping them swiftly and accurately diagnose children's eye conditions.

"The doctor told us that my child's eye has eye cancer. I was completely devastated,"
says Sombiniaina's mum, Rasololarisoa.

...and maybe **even a life!**

Some eye conditions are life-threatening, such as Sombiniaina's. If these children don't receive urgent diagnosis, treatment and care, they will die.

"Maybe she can recover," her mum said.

"Let's pray to heaven!"

A gift from your church today can **save a child's sight** – and maybe even their life.

...to **save a child's sight...**

Through your church's generosity, more families like hers can receive the diagnosis, treatment and support they urgently need. Early diagnosis gives children the best possible chance of treatment and recovery. Together, your church can bring hope to parents.

"And now these three remain: faith, hope, and love. But the greatest of these is love."

– 1 Corinthians 13:13
