

0:00

there's definitely a connection between

0:01

visual problems

0:03

and poverty so i'm isabelle

0:07

and i'm the optometrist here in coma

0:15

there are not a lot of places where they

0:16

can can go to get help

0:18

so there are not a lot of

0:20

ophthalmologists in the country

0:23

and then also like places where they can

0:26

get glasses

0:26

are quite scarce so they have to

0:30

travel quite long distances and if they

0:32

go to town

0:33

which is longer it's obviously quite

0:36

often it's not affordable for the

0:37

patients

0:38

from the rural areas and obviously

0:40

children with

0:42

visual impairment or blindness they will

0:44

not be able to go to school

0:46

because they don't get there and there

0:49

is no special support for

0:51

children in with those conditions

0:57
