

Assamualikum! I am Mohammed Jakir Hossian

And a person with a physical disability.

I run a small convenience store with the loan from the Department of Social Services

And also took a loan from my Self Help Group.

My business was going well but had to shut down suddenly due to the coronavirus pandemic and I am having a hard time.

The store has been closed for two months and my savings are finished also.

I wasn't getting any support.

They received some relief from a grassroots organization of persons with disabilities

And then I received support from our group when the previous relief item was about to finish.

Currently I'm maintaining my life with this support.

Other persons with disabilities like me are having hard time also.

Those who were working in garments, are also in trouble due to the closure of garments factories.

They don't have enough money to go for medical help if they get any sickness.

There is no transportation available to go to doctors of hospitals, roads are closed,

Which is making it difficult to get proper medical treatment.
